Delineation of administrative boundaries on
this map is approximate.

- Very High
Areas usually with steep to very steep slopes and underlain by weak materials. Recent landslides, escarpments and tension cracks are present. Human initiated effects could be an aggravating factor.
- High
Areas usually with steep to very steep slopes and underlain by weak materials. Areas with numerous old/ inactive landslides.
- Moderate
Areas with moderately steep slopes. Soil creep and other indications of possible landslide occurrence are present.
- Low
Gently sloping areas with no identified landslide.
